

Bay Corridor Transmission & Distribution Project (BCTD)

Purpose: Construct and install new electrical substation, duct banks, vaults, conduits, and equipment in southeast San Francisco to serve new institutional customers

Project Cost: \$150M*

Progress and Status:

- Installed all the duct banks, conduits, and vaults. Installing electrical equipment now.
- Electrical utility line installation on Illinois Cargo, 3rd, Davidson, Quint, Rankin, and TFB includes traffic management measures. No impact to Muni.

Project Timeline:

- System completion expected May 2022*
