

Port of San Francisco

As-Needed Micro-LBE Structural Engineering Services

PROJECT DESCRIPTION

The Port intends to advertise an as-needed Micro-LBE project for structural engineering services for upcoming Port projects. The scope of services includes structural engineering consulting, inspection of marine and land-based structures, peer review of structural engineering designs, structural plan review, cost estimating, and constructability reviews.

The value of the contract is expected to be \$1 million with a term of four years.

ANTICIPATED SCHEDULE

- Advertisement of RFP Q3 2023
- Award of contract Q4 2023
