

Port of San Francisco

Pier 70 Shipyard Shoreline and Sediment Remediation

OVERVIEW

The objective of this project is to stabilize and cover the exposed shoreline (intertidal) and subtidal (in-water) zones with material that will prevent erosion, dispersion, and exposure to contaminated sediment. The location of the project is the undeveloped area to the east of Crane Cove Park. This project is a continuation of a sediment cap that was already placed in Crane Cove Park.

The estimate for construction is \$1.5 million.

SCHEDULE

Activity	Target Date*
Commence Contract Advertisement	June 2023
Pre-Bid Conference	June 2023
Due Date	July 2023
Notice to Proceed	September 2023

*Subject to change
