

Port of San Francisco

Pier 29.5 and 31 Ventilation Project

OVERVIEW

This project will install a new ventilation system at Pier 29.5 and portions of Pier 31. The objective of the project is to maintain low carbon monoxide levels produced by parking vehicles.

The engineer's estimate for this project is \$750,000.

SCHEDULE

<u>Activity</u>	<u>Target Date*</u>
Commence Contract Advertisement	Nov 2023
Pre-Bid Conference	Nov 2023
Due Date	Dec 2023
Notice to Proceed	Feb 2024

*Subject to change

PROJECT SCOPE

The scope of work is to install a ventilation system that will utilize the existing window and door openings at Piers 29.5 and 31 to moderate the levels of carbon monoxide generated by parking vehicles. Fan operation will be controlled by carbon monoxide sensors.

Major Categories of Work

- Mechanical Ventilation System
- Structural Supports for Ventilation System
- Electrical Work for Carbon Monoxide Sensors
