Additional notes: Data provided are distinct incident report counts for the timeframe and geography requested, as aggregated through the publically available incident reports dataset housed by DataSF (link below.) This dataset applies a geo-anonymization technique that places all incidents at a nearest intersection, therefore additional incidents from up to 1 block outside of the noted geographic boundaries may be included in this data. Certain confidential incident reports (for example, restraining order violations, child abuse, and others) may not be included in the data set to protect victims from re-identification. Juvenile data is not included in this dataset per W&I Code Sec 827. Further dataset documentation can be found here: https://bit.ly/2x7Ta2P
