

Measures Explorer

FLOOD MEASURES:

Physical Infrastructure

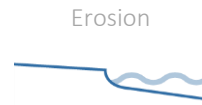

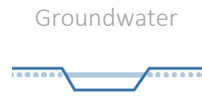

Tide Gates

DESCRIPTION:

These measures are operable structures that apply to waterways such as creeks and rivers that can be closed to reduce flood risk during storms events or extreme high tides. These structures allow for boats and other maritime vessels to pass during standard operations.

SHORELINE LOCATION:	DESIGN LIFE 50+ years	IMPACT ON THE WATERFRONT Major Intervention
 In Water	ADAPTABILITY Varies	CONSTRUCTION COST TBD

COASTAL FLOOD IMPACTS MITIGATED:

Types of Tide Gates:

Gates and Barriers

Locks
