

Overview: Waterfront Plan Goals and Relationship with Working Group Subcommittees

This chart provides a high-level overview of the structure of the goals and policies in the current Waterfront Plan, and indicates where new goals or policies will be added or where substantial updates are anticipated. This chart also illustrates how Waterfront Plan content corresponds with the Land Use, Transportation and Resilience Subcommittee meetings in Part 2 of the Waterfront Plan Update public process. It is expected that the Subcommittee meetings will raise crossover issues (e.g. urban design, financial, public engagement) of shared interest between Subcommittees. All Subcommittee meeting information will be shared with the full Waterfront Plan Working Group, Advisory Teams, and the public. Find meeting schedules and information @ SF.PORT.COM/WLUP.

	Subcommittees			Working Group			
	Land Use Focus Maritime & open space, development and leasing, Embarcadero Historic District requirements, public review process	Transportation Focus Maritime industrial access; transportation demand management; pedestrian, bikes & public realm	Resilience Focus Seawall and sea level rise, historic resources and urban design, environmental sustainability & emergency response	Port Finance, Public Engagement, Urban Design Working Group will collectively review recommendations on these topics, along w/ subcommittee recommendations
