

Measures Explorer

FLOOD MEASURES:

Physical Infrastructure

Deployables

DESCRIPTION:

Structures and elements that are placed and sited in advance of a storm event to provide flood protection barrier at their specific location. Some deployables are stored and have to be manually spaced and set up by a team of workers in the event of a flood. Others are embedded into the environment and mechanically operated to automatically provide flood protection in the event of a large storm.

SHORELINE LOCATION:	DESIGN LIFE Temporary	IMPACT ON THE WATERFRONT Major Intervention
 Upland or Asset Specific	ADAPTABILITY Low	CONSTRUCTION COST TBD

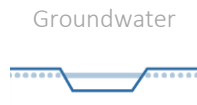

COASTAL FLOOD IMPACTS MITIGATED:

Sea Level Rise

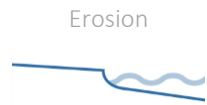

Storm Surge

Groundwater

Waves

Erosion

Types of Deployables:

Inflatables

Post and Panel

Mechanical and Bouyant Gates

Sandbags
