8.0 Utilities

A utility plan showing any water supply or waste water control systems and diagrams for any electrical systems (low and/or high voltage and/or generators) that are provided for this event is included within the submitted plans.

Ratings of the electrical supply and voltage outputs are indicated within the utility plans for the electrical system.

Temporary electrical service is provided by generator(s).

A single line electrical drawing is included within the submitted plans.

Check below to indicate any utility costs that are included in the License Agreement for this event.

Domestic Water.

Electrical Power (low or high voltage).

Waste Water Control.

Gas Services.

**Application may not be acceptable (subject to Permit Desk review)*

***n/a means Not Applicable because no such facility or item exists at all*
